Logo

The icon is a recording light with a B in it. It always sits to the left of the wordmark, at the same height as the capital letters. Clear space on every side equals the width of the icon.

Icon

Profile pictures, favicons, watermarks. On yellow, the dot switches to ink.

Small sizes

Don't

Stretch or rotate the logo. Change the dot to any color but red (or ink on yellow). Outline it, add shadows or gradients. Put it on a busy photo without a dark band behind it.

Color

Ink

#121212 · RGB 18 18 18

Type, dark backgrounds, reel end cards.

Paper

#F4F1EA · RGB 244 241 234

Documents, proposals, light backgrounds.

Buzz Yellow

#FFC629 · RGB 255 198 41

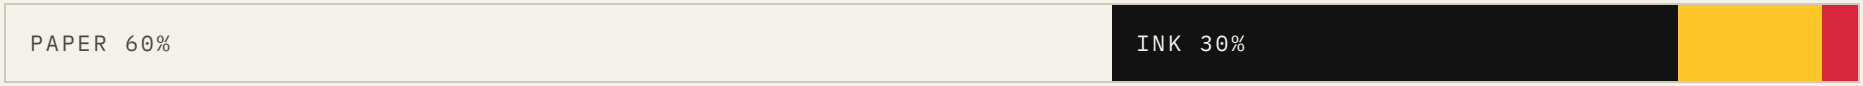

The one accent: a key word, a tag, a thin line.

Record Red

#D7263D · RGB 215 38 61

The logo dot. Never used as a background.

Balance

Mostly paper and ink. Yellow is used sparingly so it always means "look here." Red belongs to the logo. Captions and fine print use Stone #6B6B6B.
